

Papers on
Spanish Colonial and Foreign Relations

The material of Volume I is composed almost in its entirety of official correspondence between the Royal Spanish Government and its officials in New Spain. There are also printed forms, orders, commissions and bulletins. The manuscripts deal primarily with the Spanish financial, commercial and industrial interests in New Spain, viz: sales, shipments, revenues, administration of the mercury business particularly, as well as the tobacco and silver mining interests, references to the potentialities of the salt-peter trade and pearl fisheries. Also included are military orders, tax, commercial, government and anti-Jesuit decrees and analyses of wages and conditions of labor in the workshops and mines.

The group of manuscripts in Volume II deal mainly with the establishment of intendancies in Peru, the register of persons serving the Spanish Government in Peru and the register of provinces under the jurisdiction of the archbishops of Lima, Cuzco, Guamanga, Arequipa and Trujillo and the amounts of taxes contributed by cash. There are other materials giving advice and means of collecting taxes and also formularies for various offices as provided for in the constitution. Most papers in this volume are undated printed forms not bound in chronological order.

The documents in Volume III are of a varied political nature. This volume comprises material on the Royal Spanish Family, War Treaty with France, business of Royal Council, Treaty with Britain and the Southern Provinces, creation of Spanish cardinals, judgment of Regents concerning the expulsion of Jewish people from Milan. Many of the documents in this volume are copies.
